

## **Aydan Wallace, Hill School**

### **Fall Winds**

The October wind,  
Subtle and warm.  
It grows louder.

### **Winter Trees**

The tree rests southwest  
dry, cold dark against the bark  
now faces a house

### **Spring Wasps**

Wasps fly by my eyes  
As fast as a car goes by  
Smack the wasp, it dies.

### **Summer Heat**

Summer is too hot  
I overheat at camp  
A lot of headaches
